Dear sir,

It is with profound sadness I learned the truth about this project - specifically the violations of State and Federal laws that did not allow for any public comments after an environmental assessment was completed.

As a member of the area, I stand with the residents who had their rights so flagrantly denied. If Pyramid thinks their illegal actions will go unnoticed or ignored, I hope they now know differently as law suits are brought against them.

The town should be ashamed at their lack of leadership and accountability as lead agency on this project.
The inability to execute your duty is clear - please step down and allow a truly concerned and educated entity take over.
The NYS Department of Conservation, for one, would be ideal.

As the loss of businesses mount, I agree with others who have suggested that Costco step back, reassess, and consider space that will most likely become available in the Crossgates Mall as a possible alternative to creating another redundant, unnecessary building.

Sincerely,
Elise HarrisonSmith
