Greetings,

I urge the Town of Guilderland to take the longview on this project and not allow the clearcutting of priceless ecological treasures for a short-sited Costco. There are plenty of other suitable locations and parking spaces for these development projects that aren't on rare and endangered habitats.

I live in the city of Troy, but this decision will have far-reaching effects in our region. Pollinators are already in danger from habitat loss to pesticide use; the agricultural and agrotourism economies our state relies on can't afford to lose it's pollinators.

The Albany Pinebush is a treasure we should cherish. What kind of example does it set for our region and the rest of the world, especially at this time when we are on the brink of world ecological collapse?

Do not allow the Pinebush to be sacrificed for this project.

Sincerely,  
Alexis G.
