To the Guilderland Town Planner and Guilderland Planning Board:

With respect to the above referenced matter, I believe that the project would be detrimental to the Town. Such a massive project would have severe environmental impacts not only to the endangered species and its habitat that make the Pine Bush home but to the residents of the town of Guilderland by way of increased air and noise pollution, adverse impact due to storm water run off as well as increase in traffic to the area. I would also note that the project should be denied based upon the Town's own Westmere Corridor Study.

Yours

John R. Canino
