Town of Guilderland,

As someone who is employed in the Town of Guilderland, I have been watching the planned development on land near Crossgates very closely. For more than three decades, the mall has been an important anchor in the business community in Guilderland and Albany County. Crossgates supports many local small businesses and non-profits in our area and has always been a good community supporter.

This development and its location make perfect sense to keep commercial business in the area and to not have a negative impact on traffic. This will further support local small businesses in the area and will also provide a much-needed boost to the current economy. Especially now, this is needed.

In addition, these improvements will help create more county sales tax revenue, while creating more property tax revenue for the Town. Finally, it will also create jobs, which are needed now more than ever.

I believe this is a well thought out development which will produce results for the Town and County and I hope it will get the approval it deserves.
