Hello,,my name is Kevin Sokol.I reside over on westmere terrace.Just want to let you know I support the Costco project.The only hope is they tie in around it nice landscape and organic walkways and cool foliage to create a nice atmosphere so to add to the community and not create a cold ecosystem. You see,,when you create a sense of harmony in a disjunct world,,so too will build a better life for everyone and nature and not segregate. You do have some interesting landscape around the area and I think you can preserve and at the same time enhance and at the same time draw people in a good way. I've been in the Costco in Camilus ny and I thought cool and they had a nice layout.I think if you plan this project right and not be destructive on the eyes,it will be a win win experience for everyone
