Dear Guilderland Planning Department,

I am reaching out to ask that the town support the proposed construction of a Costco near Crossgates. The development has been needed for years and will bring with it a strong and much desired retailer to our market. No longer will we need to travel to another county an hour and a half away, much less another state. The town, the county and the schools need this.

I strongly believe that this Costco will bring more shoppers to the town, which will help support not only the local businesses inside the mall, but will do so for the businesses outside the mall as well. At a time when we need to look at the future of our economy and how we start to make a come back after the COVID-19 crisis, there is no better time than now. We cannot stand in the way of development that will only help our local workforce and bring new and needed tax revenues to both the town and our county.

Please approve of Costco..... it will be a tremendous win for the Capital Region.

Thank you-
Brandon Castle
