I am in full support of this project provided that union labor is represented on the job. Any use of public moneys should require not just union labor, but should include claw backs for any misrepresentation of promised job opportunities. We should also insure that local people are on this job and not an "out of town" workforce is brought in to perform the construction. A workforce from out of town does not support local businesses that are already established in this area. I ask that all of these issues be looked at before any construction starts on what could be a wonderful new business in our area.

Thank you,

Wayne McMahon V.P. local 7 Plumbers and Steamfitters Albany, NY
